design Mario Ferrarini

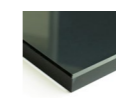

Extendable coffee table made of a supporting clear or smoked tempered glass top, 12mm thick, contained in two "shells" made in "folding" of DOLUFLEX®, lacquered RAL-K7 9010 white. The lower part of the aluminum panel is milled to allow the insert of

the steel rod feet. The shells are fitted with runners in a self-lubricating material, to allow them to slide. Steel rod feet Ø20mm h21,3cm, lacquered in RAL-K7 9010 white, screwed to the glass top with a bushing. Floor support secured by black adjustable PVC feet.
