

EXTRASOFT | INDOOR - OUTDOOR

design Piero Lissoni

Modular elements of different dimensions available for indoor and outdoor.

Indoor version: frame in double-paneled poplar and pine. Support in cross-woven coated rubber elastic straps. Padding in differentiated density polyurethane foam covered with a quilted mat in prewashed and sterilized goose down, stitched into separate compartments or, on request, padding in differentiated density polyurethane foam with a mat covered with acrylic fiber layers. Fabric or leather upholstery, both fully removable by Velcro fastenings. With black adjustable plastic feet.

Outdoor version: frame in steel lacquered for outdoor for bases and in steel lacquered for outdoor and plywood for outdoor for backrests and armrests. For bases only, support in cross-woven, coated rubber elastic straps and hooks in Stainless Steel for outdoor. Padding with open cell structure polyurethane foam, with a quilted mat in fiber for outdoor use with draining fabric cover. Upholstery with outdoor fabrics only, fully removable by Velcro fastenings. With black adjustable plastic feet. The various elements are joined together by means of hooks. Seat depth 68 - 94 - 120 - 134 - 146 cm.

Notes

All elements can be ordered 5 to 10cm higher than standard.

On request, all indoor elements can be covered with the mat in acrylic fibre layers, instead of goose down.

On request can be ordered a spacer, to lift the elements of further 4 cm: for the indoor version only, through spacers (A) the to be screwed to the standard feet, meanwhile for the outdoor version by replacing the standard feet (h. 8 cm in total) with a foot with a height of 12 cm.

The various elements are joined together by means of hooks, as per the instructions supplied with the product.

For composition with different elements, please attach a general sketch to the order.

On 146 cm and 172 cm armrests and backrests, with upholstery in patterned, floral, textured fabrics, or velvet and leather, there is always a central stitching. On the 146 cm base, both in fabric and leather, there is always a central stitching. If this seat element is combined with a 146 or 172 cm armrest or backrest, these will also be provided with a central seam.

According to the product shape, some coverings cannot be used: please refer to the adaptability sheet in the "Materials" section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.

For the Outdoor version, especially after prolonged rainy or humidity periods, it is suggested to rotate the elements and/or to temporarily lift the seat/back/armrest cushions to allow a complete drying and to avoid accumulation of dirt and moisture, causing the formation of mold.

It is recommended to use a "Protective Cover" to improve the longevity of the product; please note that the protective cover is made of water vapor repellent fabric, perfect to prevent and protect from the formation of mold, easily washable with water and soap. Do not keep the fabric folded for a long time when it is wet. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website. Lastly, we recommend placing the product on terraces or verandas to guarantee its durability over the years.
