

## Family Chair (indoor - outdoor)

design Junya Ishigami

Collection of 5 different chairs available for indoor and outdoor. Structure in 12mm steel rod, curved using a CNC machine and legs in 15mm steel rod welded together using internal reinforcement. Seat mesh is in 3mm steel wire with a 40x40mm diagonal weave, individually calandered for each seat. Finish with cathaphoresis coating to allow outdoor use and epoxy powder coating in RAL-K7 9016 white. Seat cushion padding: **indoor** version in polyurethane foam covered with acrylic fibre layers, with fabric or leather upholstery; **outdoor** version in polyurethane foam for outdoor covered with fibre layers for outdoor and upholstery with outdoor fabrics only. Each chair has its own shaped cushion. Cushion's upholstery, in both versions, fully removable by zipper.

### Cushions
