

Sailor

design David Lopez Quincoces

Bookcase inspired by the world of boating, which allows maximum freedom for floor-to-ceiling or wall mounted compositions.

Sailor features steel uprights with hexagonal section 25mm, fitted with holes having a center to center distance of 38.5cm (35cm of useful space) to install the shelves, and an additional wall fixing spacer, for greater structural rigidity (for the wall mounted version only).

Uprights finishes: matt transparent liquid painted steel or matt bronzed coloured and matt transparent finish.

Floor-to-ceiling support plates with joint, Ø50mm in satinized brass with a transparent matt varnish, screwed to the uprights.

Floor, ceiling and wall support secured by black PVC elements.

Maximum height of uprights: floor-to-ceiling version 305cm; wall-mounted version 251cm with plate fitted for wall mounting (with a fisher).

"Keel shaped" shelves, available in sizes 75/90/120 /150cm depth 33cm, made of MDF with embedded an extruded aluminum bar, at the ends of which are joints to fix them to the uprights.

Shelves available in the finishes: top and lower part painted matt black; Stone Oak® veneered top with matt black painted lower part; top in bleached maple with lower part in Canaletto walnut "rigatino" (with solid edge).

The lower part, on request, can be lacquered in the colour in collection.
