

AERO B

design Shibuleru

Bar unit composed of monoblock container consisting of top and bottom in 18 mm thick MDF fitted with a contoured runner to house a sliding shutter door made of extruded aluminium. Aluminum "blade-handles" section 10 x 8 mm thick, screwed to the shutter. Central body in contoured MDF milled on the outside, with internal side panels and central support shelf in MDF. Contoured lower shelf, in double-panelled wood, 18 mm thick, consisting of a 7 cm frame in solid beech wood and board honeycomb, enclosed by two aluminium plates, fitted with holes and bushings to allow assembly of the uprights. All MDF components are painted RAL 9017 matt black. Shutter door with liquid painting RAL 9017 matt black only.

Uprights in steel rod Ø22 mm, with inserted fixing element for the lower shelf. The frontal upright is provided with contoured plate for the fixing of the container compartment; while the other uprights are screwed to the backrest. Two additional steel rod supports, with integrated height adjustable plastic foot, are screwed to the lower shelf. Uprights, additional supports and feet are finished with epoxy powder coating in RAL 9017 black. Available with internal spotlight equipped with motion sensor and rechargeable lithium battery. Charging with induction system and Micro USB cable. Available with 3000K light.
