

KASBAH LOW TABLE | OUTDOOR

design David Lopez Quincoces

Coffee tables available in the sizes 70x100 cm and 100x100 cm, consisting of a supporting frame in solid Teak wood section 90x35 mm. Black milled HPL 8 mm thick panel inset into the supporting frame and supported by corner and central moulded supports in recycled and regenerated polyamide, fixed to the supporting by means of stain less steel screws.

Coffee tabletop (thickness 2 cm) with 45° bevelled edges, fixed to the HPL panel, in plywood for outdoor use veneered with Teak slabs always divided into two (only for the size 70x100 cm) or three sections. Feet in solid Teak wood Ø40 mm, fixed to the corner supports through an embedded bushing, and floor support guaranteed by black adjustable elements.

Teak

Notes

The solid Teak comes from certified plantations. It is an extremely resistant material, thanks to the presence of an oleo-resinous component that guarantees excellent durability. We also remind that Teak is a living material that reacts to external factors. Prolonged and continuous exposure to them changes the surface layer, up to oxidation which gives it a silvery-grey tone. Moreover, it can show small alterations in color and size. Teak may therefore present not homogeneous shades of color, to be considered as a quality and not a defect. For the maintenance of Teak kindly follow the instructions included in the maintenance kit supplied with the product.

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

It is recommended to use a "Protective Cover" to improve the longevity of the product; please note that the protective cover is made of a water vapor repellent fabric, perfect to prevent and protect from the formation of mold, easily washable with water and soap. Do not keep the fabric folded for a long time when it is wet. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website. Lastly, we recommend placing the product on terraces or verandas to guarantee its durability over the years.

For wooden finishing the "Outdoor Wood" Maintenance Kit is included with the product.

The coffee table could be used in composition. The various elements are joined together by brackets, as shown in the drawing below.

For compositions with different elements and coffee tables, please attach a general sketch to the order.
