## **Living Divani @ The Ritz-Carlton Residences, Miami**

---

The Ritz-Carlton is a residential project designed by Piero Lissoni, overlooking the waterfront of the beautiful city of Miami, in front of the island of La Gorce. Divided into 111 residential units, eight independent villas and seven villas with gardens, it stands out for its refinement, essentiality and elegance.

Living Divani emphasises the minimalist beauty of spaces, proposing modern, relaxed and contemplative furnishing solutions that perfectly blend with the surroundings: living rooms, lobbies, cinema space, game room and large terraces overlooking the sea. Upholstery and complements, sofas, armchairs, tables and low tables, contemporary items, relaxed and contemplative seating, charming and evocative, for both indoors and outdoors, match with the architecture with large windows inspired by 'European purity'.

Delicate nuances, traditional declinations in a contemporary key, formal purity are the aspects that define the stylistic choices of the Ritz Carlton project: minimalist and balanced residences and a layout that enhances their proportions and dimension through a selection of Living Divani products, that unveil a continuous search for perfection in detail and a high focus on quality, alongside other refined proposals.
