

EMOTIONAL PILLS – Chapter 5

Living Divani draws inspiration from natural movements, combinations of lines and shapes in space, architectures, and geometries to continue the emotional narrative of its collection.

The scene is introduced by the **Moon Coffee Tables**, which evoke the celestial body in its various phases and transformations. As Earth's satellite, this mysterious planet becomes both a representative and symbol of the key characteristics of this family of furnishings: rotation, purity, and circularity. While the first one allows for the concealment and simultaneous revelation of functional storage compartments, the others contribute to essential and absolute silhouettes that highlight the elegance of wood.

Curves also define the **Greene sofa**, embracing while conveying the idea of dynamism. Its sinuous profile recalls the fluid patterns traced on snowy landscapes: a rhythmic flow that is recurring yet never monotonous. The essence of this upholstered piece is a call to comfort, an invitation to be carried away and hugged by soft yet impeccable relaxation.

The **Aero B** bar cabinet is a play of intersections: horizontal and vertical lines meet, alternating full and empty spaces. Every detail works together to convey a sense of lightness, reminiscent of elements that harmoniously float on water, as if suspended. This interplay with light becomes protagonist, revealing—through the sliding door—a storage compartment designed to meet the evolving needs of contemporary living.
