Focus on the Styling Project

Small sculptures of archetypal and contemporary forms interact with the elegant proposal of Living Divani. This is the styling project curated by Elisa Ossino Studio which, with its abstract graphism, adorns tables, coffee table, console and libraries, enhancing the natural beauty of these products. Geometrical and minimalistic objects combined with pure materials such as marble, ceramic, metal, bronze and paper create a synergy game, with multiple possibilities of composition, which completes the refined atmosphere and soul of Living Divani.
